

GOALIETM GHOST

GOALIE GHOSTTM is a three-dimensional perspective sports game in which players attempt to kick a ball through an opponent's goal. Each player controls one semi-transparent goalie who both defends his own goal and takes shots at his opponent's. Players move their goalie with a trackball and make him jump by pressing a button. The game may be played by one or two players. Each player sees the game from both his own and his opponent's point of view. The top half of the monitor shows one view and the bottom half the other. Players select their level of difficulty when play begins.
